

Perceived Spending Behavior towards TikTok Products

of AddU College Students

ROLE OF TIKTOK ON SPENDING BEHAVIOR

WHY IS IT A PROBLEM?

1

BUDGETTING

Budgeting allowances may be challenged due to purchasing anything as a response to wants and the pressure from external agents, such as tiktok to do so (Kumar et al., 2016)

2

DECISIONS

Studies show that social media acts as a socialization agent shaping spending attitudes through herding behavior, fear of missing out, and reduced pain of paying.

SIGNIFICANCE OF THE STUDY

It helps students, schools, and families recognize how TikTok influences students' spending decisions and supports the development of better financial awareness and discipline
